June 2016

Dear Parents/Guardians,

In an effort to help students retain their math skills this summer, we are providing students with an opportunity to complete a summer math packet. The summer math packet contains problems that focus on mathematical concepts and skills that students worked on this past year. A general understanding of these concepts is necessary for success at the next grade level. To prepare students for continued success, we ask that you take a moment to print a copy of the summer math packet and encourage your child to complete it over the summer.

If you do not have access to a computer or printer, you may request a copy of the summer math packet from your child's school. To access the summer math packet go to:
